AHA INSTRUCTOR RENEWAL

As long as your AHA BLS Instructor card is current, you are an active instructor, and no changes have been made to the AHA courses, you do not have to take an in-classroom instructor course to renew. You may, instead, be monitored teaching the AHA course of your discipline.

If you choose to be monitored without taking the in-classroom instructor course, you must have strong instructor skills. We strongly recommend you audit one of our BLS Provider courses prior to being monitored.
